INTRODUCTION over 50 years of experience

Can is a leading internationally operating construction company with over 50 years of experience. Complete services for construction, engineering, consulting and turnkey projects are available all over the world, especially within our offices in Karachi, İstanbul and Ashgabat.

Can has a rather diversified experience in turnkey construction and engineering covering residential, medical, hospitality, office and industrial facilities.

Projects which are undertaken by Can as the main contractor, are then assumed by the group members concerned according to their fields of specialization. This makes it possible for Can to offer a full range of services.

With approximately 50.000.000 TL turnover, 100 technical and administrative personel. 2000 workers and a rich equipment park.

Can operates in many countries spread over 3 continents, rendering the highest level of services both in Turkey and abroad.

During the past years, can has been known for executing the works in high quality and completing them on time or even earlier. A strong and dynamic management system, the most advanced planning and programming methods, sophisticated logistics, quality control at international standarts, own production of execution and detail design as well as ever is increasing international cooperation, are the basis of this success.

The following pages summerize and illustrate the main lines of activity of Can as well as the projects undertaken with more emphasis upon the work performed during the last five year period.

PRESIDENT'S WORD

The best quality, in the shortest time possible

First of all, I would like to express my satisfaction for obtaining the opportunity to celebrate the 20th anniversary of our Company and I thank all of my colleagues who have contributed to this.

We have strived, as much as we could even under difficult conditions, contribute with keenness and sincerity to the development efforts of our country, benefitting from the possibilities provided by globalisation, utilising the most advanced technologies and most contemporary technical methods and we always believed in and considered the fact that it is our duty obtain the opportunity to compete at every level.

With this belief, we have rendered service both in the public and the private sectors. We have felt comfort and pride in providing the most suitable service to the reinforcement, repair and modernisation works, realized in order to remedy the damage caused by the

agonising earthquake of August 17, 1999 and to realise secure constructions.

The successful jobs we have realized in Yalova and Kartal, have led our Company to be recognised and seeked as an expert Company in the remedy and reinforcement of the earthquake damages. We have realized major projects in the construction of offices, business centers and production plants.

Within this period of 20 years, our colleagues have keenly and meticulously placed a major importance to quality and time, always considering technology, therefore matching my experience accumulated in 50 years in the public and private sector projects in Turkey and abroad.

I am proud of being under the same roof with the young, dynamic, right minded, responsible, informed, decent employees of Can Construction Industry Trade Ltd. Co. The members of our Company are aware that, the

indispensable quality of business life is to offer "The best quality, in the shortest time possible" and they turned this principle into indispensable passion for them. Our Company has established mutual trust in the relations and has been fully committed to the principles I have mentioned above and the success achieved has brought appreciation in business life and in its

environment, making me and all of the "Can Brothers" invaluably proud.

We believe that we will achieve many other successful jobs together in the future and we already feel proud of our future achievements.

QUALITY POLICY

The Fundamental of the Quality Policy applied by Can as an international contractor to achieve its mission and target of providing high-quality construction and engineering services in international standards is always to comply with the applicable laws, regulations and technical specs and standards, to use environment -friendly and state-of-the-art Technologies and methods, to be always customer focused, progress-oriented and performance driven in completion of the contracted Projects in requested quality and on time, and thus satisfying its customers by understanding and meeting their expectations and needs.

Principles applied by Can for implementing its Quality Policy are:

- complying with the applicable laws and regulative rules of host countries;
- completing the contracted projects in requested quality and on time by using environment-friendly and state-of-the-art Technologies and methods under consideration of any applicable national and international standards, technical specifications and work schedules;
- applying through the committed quality management system through joint contribution of all our managerial staff members and employees;
- providing always close cooperation and coordination with our subcontractors

- and suppliers for achieving progressive development;
- improving through and enhancing the level of technical knowledge and skill of our employees by promoting efficiency, creativity and adaptation through team-work;
- while ensuring the efficiency of our quality systematic, through increasing the working productivity:
- decreasing the costs and causing our customers to benefit therefrom;
- increasing our profitability and causing our investors and employees to benefit there from;
- while applying systematic approaches and methods for solving problems, continuing the usage to take the necessary measures prior to occurence of any problems;
- increasing our profitability and decreasing costs through minimizing the losses during workings at sites;
- entering into long-term cooperation with those subcontractors/specialized teams that adopt Rules and Principles of Can and work with the "win & win" principle.

It is Can's aim to complete its contracted Projects always by *"zero tolerance"* against accidents at work pursuant to its HSE Policy.

HSE POLICY

When doing its job, Can aims always, by taking proper preventive and protective measures pursuant to its HSE Policy, to protect its employees or/and any other people, against any eventual hazards, occupational accidents and Professional diseases, and also to avoid any damage to incur to any property or the environment to be impacted by works.

Principles applied by Can for implementing its HSE Policy are :

- providing a safe and healthy working environment for its employees;
- taking preventive and protective measures pursuant to the applicable labor laws and working regulations as well as its HSE Policy;
- ensuring its HSE Policy and all the related rules to be complied with and applied by all its employees, and periodically supervising the implementation thereof;
- enhancing the consciousness level of its employees by providing them HSE training;
- assessing any eventual risks its employees and/or any people could be enfaced with and making continuously improvements for eliminating/minimizing such risks;
- applying the "zero tolerance" principle to any and all works to be performed.

When starting a new project, Can is committed to assess the respective health, safety and environment circumstances and accordingly to develop a specific HSE Plan for such project under consideration of the applicable laws rules as well as its own HSE Policy in order to complete its job to the satisfaction of its customers and without any "loss of time".

- **PRASS INTERNATIONAL**, GERMANY
- KLAUS MULTIPARKING-GMBH, GERMANY
- **INTERPARK SPA**, ITALY
- NORD BITUMI SPA, ITALY
- **STROY INTERNATIONAL**, RUSSIA
- LUSO WIND POWER, PORTUGAL
- HORIZON CONSULTANTS, PAKISTAN
- OVE ARUP AND PARTNERS LIMITED, UK
- **SAB**, NETHERLAND

WORK AREAS

Can construction performed in the field of structures listed below are made in mechanical and electrical installation works, architecture, strengthening, project management, design and engineering;

- OFFICE BUILDINGS/ SMART BUILDINGS
- HEALTHCARE BUILDINGS
- HOTELS
- RESIDENCES
- Power Plants
- WIND POWER PLANTS
- EDUCATIONAL BUILDINGS
- BANK BUILDINGS
- CAR PARKING BUILDINGS
- WAREHOUSES
- INDUSTRIAL PLANTS
- SPORTIVE BUILDINGS
- WATER/WASTE WATER TREATMENT PLANTS

SERVICES

For the realization of the structures, Can assume services are listed below:

BUILDINGS

- Turn Key Construction
- Strengthening
- Steel Construction
- Restoration and Renovations
- HVAC ve Mechanical Works
- Electrical Works
- Interior Construction
- Recreation Construction

Infrastructure

- Waste Water Treatment
- Drinking Water
- Seafront Construction
- Highways

ENGINEERING AND ARCHITECTURAL

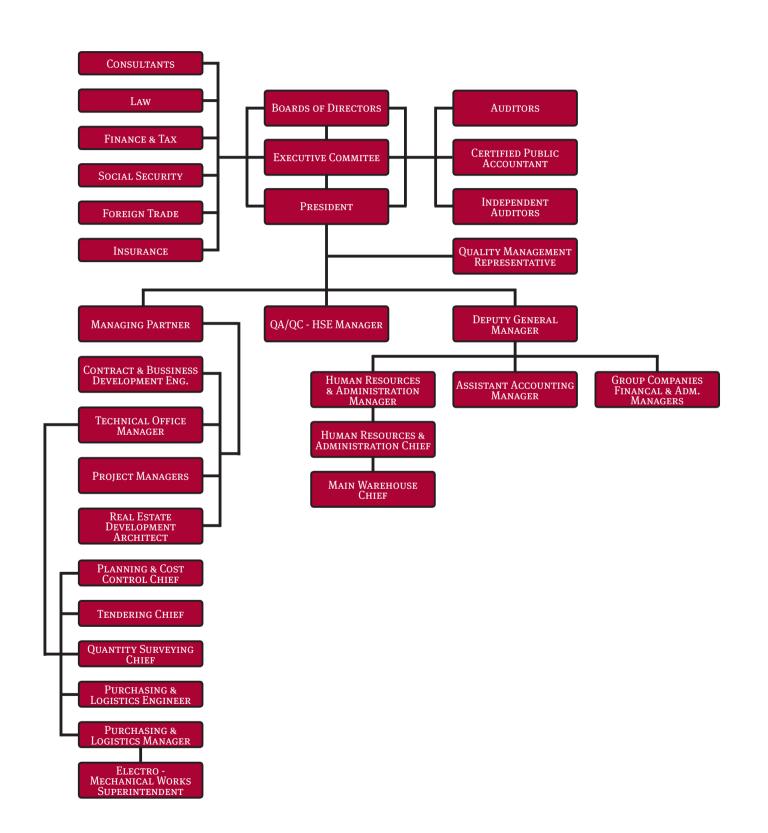

- Architectural Design
- Project Management
- Engineering Consultancy
- Purchasing Consultancy
- Wind Power Equipment Installation
- Semi and Full Automatic Car Park Equipment Installation

CLADDING

- Metal Facade and Roof Works
- Isolation Works
- Supervision
